

## FIRST DAY

Students will need pen or pencil for the first day of school and expect to be in the class room for approximately 1 to 2 weeks to complete book work before entering the shop. Approximately 1 week into the class they will need safety glasses, welding helmet, welding gloves, chipping hammer, wire brush, 11R vise grips, cutting goggles, and welding jacket.

Thomas Rollins, Principal

2400 Longleaf Drive, Pensacola, FL 32526  
Office: (850) 941 -6200 Fax: (850)941-6215

To: Whom it may concern  
From: Glen Arne Day time Instructor & Dwyne Castleberry Night time Instructor  
Subject: Welding Technology Book and Tool List  
Cc: file, George Stone Guidance Dept.  
Date: 2/27/20

Some of the items listed in the Welding Technology Book and Tool List could be considered "consumable". In other words, these items need to be replaced from time to time. I have listed below the items that need to be replaced most frequently, and *I have recommended approximate quantities that may be needed to complete the program*, (note: only the quantities listed on the tool list are required to start the program). This list may or may not be all inclusive of the items that will need to be replaced during a student's time in the welding class; however, a student should maintain his/her tools if a student wishes to make adequate progress in the class.
